Highway Garage
235 East Mosher Street
Falconer, New York 14733

PLEASE NOTE

The Town of Ellicott Highway Department will be surface treating the below listed streets.

We anticipate doing the work, weather permitting, next week (May 15-20). The actual application should take no longer than 30 minutes per street. The street will be closed briefly for application and should be drivable as soon as the stone is rolled.

Please do not park on or near the street on these days. Vehicles on the street will have to be removed.

We will be using a rapid set asphaltic oil with a polymer additive and covering the oil with a layer of limestone. Our plan is to sweep up any extra stone about one week after application depending on weather conditions.

Thank you for your cooperation.
